⚗ Selected Work Experience

Senior Interface Designer
Avid | July 2022 – current

Lead UI/UX design for industry-leading multimedia software company's web and e-commerce team. Build and maintain components and usage guidelines for company's atomic design system. Core contributor to large scale website overhaul, including component/template design, technical writing, and creation of functional requirements to guide web development teams. Provide QA testing to ensure web projects meet design specifications. Lead design efforts of numerous web projects, including a new e-commerce checkout process.

Interface Designer & Developer
Urbanimmersive | October 2018 – April 2022

Provided interface design and development for international real estate software company. Designed, built, and maintained over twenty single property design templates, supporting numerous customizations. Served as lead UI/UX designer for multiple projects.

Interface Designer & Developer
Tourbuzz | November 2015 – October 2018

Provided interface design and front-end development for startup software company. Built and maintained a robust family of highly customizable and responsive design templates. Led creation of a design system to assist with consistency and efficiency across software teams.

UI/UX Developer
The Home Depot | September 2015 – November 2015

Contract position providing interface design, UX direction, and front-end development on data visualization projects.

Senior Designer
Georgia Tech College of Computing | July 2011 – September 2015

Provided art direction and visual design for communications team. Served as lead designer for website redesign. Led visual rebranding of all communications materials. Created visual style guide for the college to establish consistency in design assets used across various mediums. Provided project management for multiple initiatives.

Freelance Web Developer & Designer
Tere O'Connor Dance | October 2014 – January 2015

Created responsive website for NYC-based dance company. Served as primary designer and developer, building a custom Wordpress theme. Designed various electronic and print communication materials.
